

**Boil Water Notice for Ladonia**  
**10/15/2024**

Due to a power outage at the system causing water outage, the Texas Commission on Environmental Quality has required the Ladonia Water System to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions).

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner like this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact Patterson Water Supply at 903-429-3008 ext. 2. We will be testing the water lines to see when this can be lifted.

Texas Commission on Environmental Quality

CERTIFICATE OF DELIVERY OF PUBLIC NOTICE TO CUSTOMERS: Issue Boil Water Notice

Public Water System (PWS) name: Ladonia

PWS ID: 0740004 Date of Incident/Violation: 10/14/2024

Area Affected:  Entire PWS  Other Area: \_\_\_\_\_

Reason(s) issued: (indicate "X" all applicable circumstances; 30 TAC 290.46 (q))

- Low distribution pressures (<20psi)
- Water outage
- E. coli or fecal positive microbiological sample(s)
- Failure to maintain adequate chlorine residuals
- Elevated finished water turbidities (Surface Water Treatment Rule)
- Line Break
- Other: Power Outage

30 TAC 290.46(q)(1) requires that your PWS make an adequate, good-faith effort to reach all consumers served by the system by appropriate methods (check all below that apply):

**COMMUNITY WATER SYSTEM (perform one or more of the following):**

- Furnish a copy of the Notice to radio and television stations serving the PWS service area
